Temporary Precinct Consolidations: In an instance where a city, township, local school district, intermediate school district or community college district is divided into two or more precincts, the precincts may be combined to conduct any election scheduled in the city, township, or school district other than an even-numbered year November general election, an even-numbered year August primary, a special statewide election or a special federal election. A "consolidated" precinct established under the allowance cannot contain more than 5,000 registered voters. (MCL 168.659)

In an instance where a county clerk is responsible for serving as a school district's "election coordinator," the county election commission is responsible for establishing the school district's precincts and polling place locations for special school elections. (MCL 168.301(5) as amended under PA 71 of 2005)

In an instance where the consolidation of precincts will make it necessary for voters to attend a different polling place location to participate in the election, the election commission must notify the affected voters of the new polling place location established for the election by mail "or other method designed to provide actual notice to the registered electors." On the day of the election, the election commission must post a notice of the polling place location change at each polling place location eliminated for the election. The notice must provide directions to the new polling place location established for the precinct. (MCL 168.659)
